Petition

Target: The Prime Minister Rt Hon David Cameron MP and Health Secretary Andrew Lansley MP

"We the undersigned"

Would like to see a full investigation carried out by the governing bodies the MHRA and NICE on these medical devices TVT Retropubic (gold standard), TVT-Secur, TVT-O and TOT. These over-marketed and over-rated products should be taken off the market and stopped immediately. They have allowed the manufacturers to put these medical devices onto the market without any long term RCT's. These products have destroyed thousands of people's health and their quality of life plus it is having a huge impact and strain on our NHS.
